Claims 20-28 are generic to a plurality of disclosed patentably distinct species comprising the crosslinking agents such as the melamine resin or blocked polyisocyanate described on page 19, lines 1-4 of the specification. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

During a telephone conversation with Warren M. Cheek, Jr. on December 5, 2005, a provisional election was made without traverse to prosecute the species of block polyisocyanate, claims 20-28.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Abstract, delete the last sentence in lines 15-18.

Art Unit: 1712

Specification, page 1, based on the preliminary amendment filed October 6, 2003, line 2, after "2001," insert --U.S. Patent No. 6,664,345;-- and after "1999" insert --, abandoned--.

Claims 21 and 22, line 2, delete "or" and replace "and" with --or--.

The following is an examiner's statement of reasons for allowance:

The closest prior art to Yamada et al. Patent No. 5,447,973 sets forth the oxazolidine epoxy resin reactive with a cationic active hydrogen compound. The reaction product of the oxazolidine epoxy resin with both a first active hydrogen compound and a second ionic group-containing active hydrogen containing compound is not recited. There is no motivation to further react the prior art oxazolidine epoxy resin with the first active hydrogen compound.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled

"Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert Sellers whose telephone number is (571) 272-1093. The examiner can normally be reached on Monday to Friday from 9:30 to 6:00. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.
